Tech lead Remote Relocation Full-time

## SUMMARY

Software Technical Lead with **12+ years** designing, building and leading **C#, .NET Core, SQL Server and Angular** systems. I currently lead the engineering team behind **Contracts**, a Saudi **digital-contracts and e-signature platform** at Azm, turning MVP goals into well-scoped stories and shipping them with a balanced senior/junior team. Before that I designed **microservices for hotels, flights, packages and Umrah booking** at HotelGate, including JWT identity, a full **Payfort** payment cycle, a factory that unified **12 hotel providers** and **SignalR** real-time search. Strong in clean architecture, SOLID, DDD and CQRS.

## CORE SKILLS

### Back end

C#, .NET / .NET Core, ASP.NET Web API & MVC, WCF, GraphQL, SignalR

### Architecture

Microservices, modular monolith, clean & N-layer architecture, OOP, SOLID, DDD, CQRS, TDD

### Data

SQL Server, PostgreSQL, MongoDB, Entity Framework 6 & Core, Redis, Elasticsearch

### Front end

Angular 2+, React, TypeScript, JavaScript, jQuery, HTML, CSS, Bootstrap

### Platform

Hangfire, Serilog, JWT, Payfort, Telerik, DevExpress

### Leadership & tools

Team leadership, MVP scoping, code review, Agile, Jira, Git, GitHub, TFS

## EXPERIENCE

### Software Technical Lead · Azm · Contracts

Jan 2025 – Present · Cairo · Remote

Saudi Azm is a Riyadh digital-transformation company building platforms for government and fintech. Contracts lets individuals and companies create, manage and e-sign contracts online.

- **Lead the Contracts engineering team:** day-to-day delivery, training exercises and individual performance.
- Work with the Product Manager to define **MVP requirements** and break them into **well-scoped user stories**.
- Distribute work evenly across **senior and junior engineers**; review code and keep releases on schedule.
- Own the **.NET Core** services and **Angular** front end for contract creation, approvals and e-signature.

.NET Core Angular SQL Server Leadership

### Senior Software Engineer · Inovola → Azm · Contracts

Dec 2022 – Dec 2024 · Remote

Inovola: software and dev-teams-as-a-service company (Egypt, UK, KSA, UAE). Placed on Azm's Contracts project.

- Worked with the product team on the scope of new features and innovations for Contracts.
- Planned, wrote and debugged web applications in **.NET Core, SQL Server and Angular**.

### Software Technical Lead · HotelGate

Jan 2021 – Nov 2022 · Cairo

B2B travel platform for hotels, flights, packages and Umrah.

- Led a team of senior and junior engineers; turned MVP requirements into user stories with the Product Manager.
- Balanced workload across the team, reviewed performance and coached engineers to grow.

### Senior Software Engineer · HotelGate

May 2017 – Dec 2020 · Cairo

- Designed and built **Hotels, Flights, Packages and Umrah** booking modules with **.NET Core microservices** and Angular.
- Built **Profile** and **User** services to manage and authenticate all system profiles and users with **JWT**.
- **Key achievements:** a **Payment service** covering the full **Payfort** integration cycle; a **factory pattern** unifying **12 hotel providers** behind one interface; **SignalR** between front end and search service to push each provider's results as they arrive instead of waiting for the slowest.

Microservices .NET Core Angular JWT Payfort SignalR

## Senior Full Stack .NET Developer · Victory Link

May 2016 – May 2017 · Cairo

Cairo telecom value-added-services company: bulk SMS, gateways and mobile marketing.

- Helped design and build the **Bulk tool system (VAS)** with .NET Framework and an ASP.NET MVC interface.
- Worked with the product team on scope; confirmed delivered software met client requirements.

## Full Stack .NET Developer · IT Fusion

Aug 2015 – May 2016 · Cairo

Cairo software house specialised in medical-insurance and claims software.

- Built features and fixed bugs for the **medical-insurance system** with ASP.NET MVC, JavaScript and jQuery.

## .NET Developer · Procoor

Dec 2013 – Aug 2015 · Cairo

Construction project-management and coordination platform.

- Built the **Human Resources** and **Accounting** ERP modules with .NET Framework and ASP.NET Web Forms.
- Upgraded the ERP project-management app to **Web API 2.2** and **Entity Framework 6.1**; improved efficiency and data quality.

## SELECTED WORK

### Contracts · [contracts.com.sa](https://contracts.com.sa)

Saudi digital contracts & e-signature, individuals and companies.  
Tech Lead.

### HotelGate travel platform

Hotels, flights, packages & Umrah as .NET Core microservices.

### Real-time multi-provider search

SignalR streaming results from 12 unified hotel providers.

### Bulk VAS tool · Victory Link

Bulk messaging campaigns on .NET and ASP.NET MVC.

## EDUCATION

- **B.Sc. Computer Science**, Akhbar El Yom Academy, Cairo  
· 2008 – 2012
- **Diploma in C# Web Applications**, IBM, Cairo · 2011

## LANGUAGES

- **Arabic**: native
- **English**: good, professional working

## RECOMMENDATION

*"It has been an absolute privilege to work under Abdul-Samad's leadership. He is a truly exceptional team leader who handles complex technical and strategic challenges with composure and precision, our steady Captain, keeping the team aligned with the bigger picture."* **Orieb Alzyuot, Senior Front-End Engineer (LinkedIn, 2026)**
